

JUST PREPARED NEW PROJECTS FOR YOU

GRANITE CUTTING CUM POLISHING UNIT [CODE NO. 1810]

Granite Slab and Tiles are used in building for the purpose of wall paneling and for the decoration of walls. So we focus as the development of building as well as industrial or residential. Moving across the should purposes of a glorious past enriched with tradition and skill, India has emerged as nation devoted to industrial development on sound modern lines. India's industrial progress present a wide spread pattern dotted all over by scores of modern industries covering wide areas of industrial activities and pulsating with modern know how and research the wide spread popularity of granite tile usually more evident in major public monumental building of traditional or conservative design.

COST ESTIMATION

Plant Capacity	500.00 SQ.MT./day
Land & Building (2 Acres)	Rs 5.50 Cr

BLENDING AND BOTTLING PLANT OF COUNTRY LIQUOR FROM GRAIN BASED ENA (FULLY AUTOMATIC) [CODE NO 1811]

The global alcoholic drinks industry is expected to exceed \$1 trillion in 2014 and is expected to witness moderate growth and reach an estimated \$1,369.5 billion by 2018. Increasing demand of alcoholic beverages in emerging countries because of their huge population base and growing consumption of alcohol by the young generation as well as rising disposable income supports the industry growth. Alcoholic beverage includes three segments such as wine, beer, and spirit. From the analysis presented, alcoholic beverage raw material suppliers as well as alcoholic beverage producers will recognize that valuable opportunities exist in the global alcoholic beverage industry, due to impressive trends in demand quantity and growth, based on the various markets.. Market volume is predicted to reach almost 210 billion liters in 2014, a 10% increase in five years. Beer, cider and flavored alcoholic beverages represent the leading market segment with over half of the overall market value. The EU represents almost 57% of the world alcoholic drinks market. The industry is characterized by fragmentation with the three leading companies holding almost 40% of overall market volume. The market is lead by Anheuser-Busch InBev, which has over 20% of the overall market volume.

COST ESTIMATION

Plant Capacity	1666 Cases/Day
Land & Building (3 Acres)	Rs 9.00 Cr

TENDER COCONUT WATER [CODE NO.1812]

Coconut water is the clear liquid inside young green coconuts (fruits of the coconut palm). In early development, it serves as a suspension for the endosperm of the coconut during the nuclear phase of development. As growth continues, the endosperm matures into its cellular phase and deposits into the rind of the coconut meat. Coconuts for drinking are served fresh, chilled or packaged in many places. They are often sold by street vendors who cut them open with machetes or similar implements in front of customers. Processed coconut water for retail can be found in ordinary cans, tetra paks, or plastic bottles, sometimes with coconut pulp or coconut jelly included.

COST ESTIMATION

Plant Capacity	4,00,000 TETRAPAK/day
Land & Building (8 Acres)	Rs 7.95 Cr
Plant & Machinery	Rs 3.63 Cr
W.C. for 1 Month	Rs. 41.72 Cr
Total Capital Investment	Rs 54.37 Cr
Rate of Return	56%
Break Even Point	23%

HERBAL CIGARETTES [CODE NO.1813]

Herbal cigarettes consist of finely cut Herbs, with certain other ingredients, rolled in specially manufactured paper. Their use has in recent years, increased considerably, particularly in urban areas, due to unharmed effect as compared to tobacco cigarettes. During 1934-35, the per capita consumption of cigarettes in undivided India was 20 the per capita figures in the different states being: Assam 44; Bombay 41; Baroda 39; Mysore 37; Hyderabad 30; Punjab 20; Bengal 19; Bihar, Orissa, Central Provinces, and Kashmir 15 each; and U.P and Madras 10 each. Prior to World War I the indigenous manufacture of cigarettes was mainly concentrated in and around Calcutta and at Monghyr (Bihar). The industry was of a modest and the Eastern India Cigarette Manufacturing Co. Dum Dum were the principal manufacturers employing on an average 1,150 labours out of a total labour force of 1,454 employed by the industry. The production was increased after the war and new factories, big and small, sprang up all over the country to meet the increased demand. There are at present 5 large groups viz., ITC, GPI, VST, GTC, NTC.

COST ESTIMATION

Plant Capacity	24000.00 Packets/day
Land & Building (1 Acre)	Rs 2.20 Cr

DATA CENTRE [CODE NO. 1815]

A data center or computer centre (also datacenter) is a facility used to house computer systems and associated components, such as telecommunications and storage systems. It generally includes redundant or backup power supplies, redundant data communications connections, environmental controls (e.g., air conditioning, fire suppression) and security devices. Large data centers are industrial scale operations using as much electricity as a small town. Data Centers house critical computing resources in controlled environments and under centralized management, which enable enterprises to operate around the clock or according to their business needs. These computing resources include mainframes; web and application servers; file and print servers; messaging servers; application software and the operating systems that run them; storage subsystems; and the network infrastructure, whether IP or storage-area network (SAN). Applications range from internal financial and human resources to external e-commerce and business-to-business applications. Additionally, a number of servers support network operations and network-based applications. Network operation applications include Network Time Protocol (NTP); TN3270; FTP; Domain Name System (DNS); Dynamic Host Configuration Protocol (DHCP); Simple Network Management Protocol (SNMP); TFTP; Network File System (NFS); and network-based applications, including IP telephony, video streaming over IP, IP video conferencing, and so on.

Manufacturing of Friction Material (Automotive & Industrial) like Brake Linings, Disc Brake Pads, Railway Brake Blocks and Clutch Facings etc to stabilize the friction level. Friction Dust is crossed linked product obtained from the reaction of Cashew Nut Shell Liquid with different aldehyde donors like Formaldehyde/hexamine /Para Formaldehyde to achieve the desired Friction dust properties. Basically it is a phenol formaldehyde resin, which is polymerized and reacted with any one of the aldehyde donors and made to powder form of various standard mesh sizes. Friction Dust have a resilient nature which cushions the engaging property of a piece of lining. In addition, they decompose on the surface of a lining at various elevated temperatures which controls the wear and offers a protective device by prohibiting excessive temperature from being developed. The inclusion of friction dust in the composition of the brake lining friction material also helps control brake noise.

CONTACT ADHESIVES
[CODE NO.1817]

An adhesive is any substance applied to the surfaces of materials that binds them together and resists separation. The term "adhesive" may be used interchangeably with glue, cement, mucilage, or paste. Adjectives may be used in conjunction with the word "adhesive" to describe properties based on the substance's physical or chemical form, the type of materials joined, or conditions under which it is applied. The use of adhesives offers many advantages over binding techniques such as sewing, mechanical fastening, thermal bonding, etc. These include the ability to bind different materials together, to distribute stress more efficiently across the joint, the cost effectiveness of an easily mechanized process, an improvement in aesthetic design, and increased design flexibility. Disadvantages of adhesive use include decreased stability at high temperatures, relative weakness in bonding large objects with a small bonding surface area, and greater difficulty in separating objects during testing. Adhesives are typically organized by the method of adhesion. These are then organized into reactive and non-reactive adhesives, which refers to whether the adhesive chemically reacts in order to harden. Alternatively they can be organized by whether the raw stock is of natural or synthetic origin, or by their starting physical phase.

**POLYPROPYLENE YARN
MANUFACTURING PLANT**
[CODE NO.1819]

The most important property of polypropylene is its versatility. It can be tailored to many fabrication methods and applications. Excellent chemical resistance, the lowest density, highest melting point (in the family of olefin fibers), and moderate cost makes it an important fiber in industrial applications. However, the poor dyeability and texturizability have limited polypropylene's applications in conventional textile industry. With the introduction of fiber denier textured yarn its use in apparel sector is becoming inevitable along with its main outlet in the industrial sector. When polypropylene was first introduced into the market in 1950s, the product is non crystallizable, which result in low melting point. With the introduction of isotactic commercial polypropylene a considerable increase in the crystallinity and melting point was achieved. Polypropylene has registered continued worldwide market share growth in recent years and it is predicated that consumption will still grow as polypropylene increasingly are used as substitution for other materials such as glass, metal, and some engineering plastics.

COST ESTIMATION

Plant Capacity	2000.00 KGS/day
Land & Building (1500 Sq.Mtr)	Rs 2.05 Cr

CEREAL MILLING

Cereal milling and secondary processing are major source of income and Cereal processing therefore offers very good opportunities for small scale enterprises. The technology is available and affordable, the demand for products is high. The main type of Cereal milled product are Maize flour, Rice flour, Sorghum flour, Millet flour etc. After cereal has been ground to flour they can be processed in a variety of ways and combined with potentially hundred of other ingredients to produce a vast range of processed cereal produced. The high demand for cereal flour and bakery products especially in Urban area has led to strong competition as more and more people start to produce these products.

Cost Estimation

RASGULLA MANUFACTURING AND CANNING

Dairy products are a major source of cheap and nutritious food to millions of people in India and the only acceptable source of animal protein for large vegetarian segment of Indian population, particularly among the landless, small and marginal farmers and women. India's high-value, high-volume market for traditional dairy products and delicacies is all set to boom further under the technology of mass production. This market is the largest in value after liquid milk and is estimated at US \$3 billion in India and US \$1 billion overseas. More and more dairy plants in the public, cooperative and private sectors in India are going in for the manufacture of traditional milk products. This trend will undoubtedly give a further stimulus to the milk consumption in the country and ensure a better price to primary milk producers.

DISTILLERY

Gin, vodka and related spirits like aquavit are distinguishable from whisky, rum and brandy which themselves have a number of common characteristics. The most evident difference is in colour, with gin an vodka normally being colourless white whisky, rum and brandy vary in shade from straw-coloured to the deepest brown. This immediate difference is linked with distinguishing features of composition and flavour which are reflected in the methods of production of the two group of spirits. The auld whisky comes from the Gaelic word wisge-beatha, as the Irish called it, incoming the water of life.

HAND WASHING DETERGENT POWDER USING THE DRY MIX PROCESS INCLUDING FORMULA OF DIFFERENT TYPES QUALITIES (LOW/MEDIUM/HIGH CAST)

The synthetic detergent industry is one of the largest chemical process industries. The most recent estimates indicate an annual U.S production of synthetic detergents of about 3 million tons with an approximate annual value of 2 billion. The industry differs from many other chemical process industries, however, in that the bulk of its production is sold directly to individuals for house hold consumption primarily as branded products, rather than to industrial or institutional users.

ASSEMBLY OF AIR-CONDITIONER/CHEST FREEZER/REFRIGERATOR UNDER ONE PRODUCTION LINE

The early attempts at air conditioning were aimed solely at providing human comfort. Colder fields were sought to be covered in the nineteenth century, and it was during this period that the foundation of modern air conditioning was laid with the controlling of humidity conditions in cotton textiles mills. In the initial stages, the air in the textile mills was humidified by evaporating water from steam ports in order to reduce breakages and static electricity of cotton yarns. The principles of air conditioning were then gradually extended to industries like printing.

Cost Estimation

CHLORINATED PARAFFIN WAX (CPW)

CPWs are chlorinated normal-alkanes with carbon chain lengths of between 10 and 30 carbon atoms and chlorinated to 40% to 70% by weight. General formula for Chlorinated Paraffins $C_xH_{(2x-y+2)}Cl_y$. Chlorinated paraffins (CPW) are made by chlorinating the paraffin fractions obtained from petroleum distillation. The paraffins are reacted with chlorine, resulting in chlorinated paraffins with varying degree of chlorination.

Cost Estimation

EPDM RUBBER PROFILES

Ethylene Propylene Diene Monomer Rubber, also named as EPDM in short, is the polymer of ethylene and propylene. Large scale commercial production began in 1963 and the current overall global consumption of EPDM are 800,000 tons per year. EPDM is polyolefine - categorised and has excellent performance of vulcanization and its gravity is the lowest among all rubbers. These are radon copolymers of the two hydrocarbons ethylene and propylene with the ethylene varying from 40 to 70% by weight.

UPVC DOORS & WINDOWS PROFILES

PVC was produced for the first time in 1935 and has been industrially manufactured in large quantities for over 50 years. It has been developed into a material that can offer a wider range of properties and therefore has many different applications. The production process starts with sodium chloride, (common salt) from which chlorine gas is obtained by electrolysis. Petroleum or natural gas is used to produce ethylene, one of many products of the process known as cracking. Bringing together chlorine and ethylene, liquid vinyl chloride (VC) is produced which is immediately changed in the process by polymerisation into polyvinyl chloride.

Cost Estimation

Best Industries to Start and Grow

DUSTLESS CHALK (SCHOOL CHALK)

Chalk was first formed into sticks for the convenience of artists. The method was to grind natural chalk to a fine powder, then add water, clay as a binder, and various dry colors. The resultant putty was then rolled into cylinders and dried. Chalk did not become standard in schoolrooms until the nineteenth century, when class sizes began to increase and teachers needed a convenient way of conveying information to many students at one time.

POTATO AND ONION FLAKES

Potato flakes are some of the most important form of dehydrated potato products that can be used in different ways including substitution for fresh mashed potatoes. Unlike French fries and crisps whose consumption patterns and diversity is well established, little or no information can be obtained on flakes in Kenya. This study was, therefore designed to assess the diversity and characteristics of potato flakes in Nairobi and Nakuru, Kenya. Potato flakes diversity and characteristics were determined through a structured questionnaire administered to attendants in 148 retail outlets (supermarkets and shops) followed by sampling and laboratory analysis of the available brands.

HDPE MONO FILAMENT NETS

A tangle of monofilament fishing line. The most common colorless variety can be seen. Monofilament fishing line (shortened to just monofilament) is fishing line made from a single fiber of plastic. Most fishing lines are now monofilament because monofilament fibers are cheap to produce and are produced in a range of diameters which have different tensile strengths (called "tests" after the process of tensile testing). Monofilament line is also manufactured in different colors, such as clear, white, green, blue, red, and fluorescent. Monofilament is made by melting and mixing polymers and then extruding the mixture through tiny holes, forming strands of line, which is then spun into spools of various thicknesses. The extrusion process controls not only the thickness of the line but its test as well. DuPont made public in 1938 that their company had invented nylon.

Start Your Own Industry

MAIZE STARCH, LIQUID GLUCOSE, DEXTROSE (MAIZE AND ITS PRODUCTS)

Starch is an abundant carbohydrate distributed worldwide in plants. Starch has been a major ingredient in man's diet over the centuries. In addition it has become a major industrial raw material. Plant seeds, roots and tubers are all sources of industrial starch production. The commercial realities of the starch recovery process limit the industrial sources mainly to wheat, maize and tapioca. Indian starch industry mainly consumes maize as input raw material. Maize (Corn) contains about 70% starch, other components being protein, fibers and fat. The basis of the maize milling process is separation of the maize kernel into its different parts.

FORMALDEHYDE RESIN (UREA, PHENOL, MELAMINE)

Approximately 1 million metric tons of urea-formaldehyderesin are produced annually. More than 70% of this urea-formaldehyde resin is used by the forest products industry for a variety of purposes. The resin is used in the production of an adhesive for bonding particleboard (61% of the urea-formaldehyde used by the industry), mediumdensity fiberboard (27%), hardwood plywood (5%), and a laminating adhesive for bonding (7%), for example, furniture case goods, overlays to panels, and interior flush doors. Urea-formaldehyde resins are the most prominent examples of the class of thermosetting resins usually referred to as amino resins. 2,3 Urea-formaldehyde resins comprise about 80% of the amino resins produced worldwide.

PU BASED FOOTWEARS

Polyurethanes can be manufactured in an extremely wide range of density and stiffness and have a broad range of applications. The densities of polyurethanes range from 6 to 1,220 kg/m³ and polymer stiffness of polyurethanes range from elastomers to flexible, rigid, and hard plastics. The global polyurethanes consumption has been growing at an average rate of over 7% annually for the

last 15 years. Thus, it is not surprising that polyurethanes are all around us, from shoes to sofas, insulation panels to automobiles, playing an important role in many ways in our daily life. In the past, polyurethanes were usually made with petroleum polyols. With the dwindling and non-renewable petroleum resource, some novel polyols made from vegetable and seed oil have been investigated for their potential of replacing the petroleum polyols.

PRECIPITATED SILICA

Precipitated Silica (also called particulate silica) is composed of aggregates of ultimate particles of colloidal size that have not become linked in massive gel network during the preparation process. It is an amorphous form of silica, the word amorphous denotes a lack or crystal structure, as defined by x-ray diffraction. Early interest in amorphous silica was purely academic. These silica have high surface area, generally greater than 3m²/g. Micro amorphous silica can be further divided into microparticulate silica microscopic sheets & fibers & hydrated amorphous silica.

SURGICAL/MEDICAL INSTRUMENTS, EQUIPMENTS, FURNITURE AND OTHER PRODUCTS REQUIRED FOR SURGERY AND DIAGNOSTICS

We are providing the Surgical instruments & Tools are specially designed tools / devices used by the experts in the Medical fraternity for performing specific actions during surgeries or operations. Over the times, These tools and Instruments have been consistently modified to reduce the trauma, make the process more efficient and improve the techniques involved. Some of the Surgical instruments and tools are designed for general use in surgery, while others may find application in specific procedure or surgery. Surgical tools and instruments are designed with single motive of improving the surgical experience. The modern age surgical instruments are more reliable, intuitive and less complicated to use. However, Surgical instruments & Hospital equipments require special care and handling for extended use.

Top Industries to Start

CHANACHUR, BHUJIA, GANTHIA (AUTOMATIC PLANT)

Dal Moth, Chanachur & Bhujia are the important names enhancing the flavour & taste as processed foods. These are food products having no historical background & becomes in market and in social & cultural synonym as the society became more advanced. Initially in long-long ago, people did not heard the name of Dal moth, chur or Bhujia like food products. But now a days it is well known not in India but world wide. These are mainly consumed during breakfast period & are very much during social & cultural periods. These are used as tasty & flavored food as well as in medicinal way, however, a little it may be, according to ayurveda) because of their carminative stimulative digestive properties. India produces almost all these types of salty processed food products of grains all these types of salty processed food products of grains like Grams, Pulses etc.

MANGANESE ORE JIGGING PLANT

Manganese is one of the most important strategic minerals, being the one which the greatest tonnages are required, and also the one in which the United States has had a limited production. Manganese is an absolute necessity in the steel industry, as this industry uses about 14 pounds of manganese in every ton of steel produced. Annual statistics show that over 90 percent of the annual amount of manganese consumed in the United States goes into the production of steel. From this it can therefore be seen that the stability and accessibility of a steady supply of manganese ore is a controlling factor in the maintenance of the steel industry. The remaining 10 percent of the manganese consumed yearly in the United States is used in the manufacture of dry batteries, chemicals, glass, tile, and brick. One of the outstanding characteristics of the utilization of manganese in steel making is that in the process of being used, most of the metal is dissipated into the slag in a form not readily susceptible to subsequent recovery as a secondary metal. In fact, the amounts that are returned to use in this way are so small as to be practically negligible, and the full requirements for each year.

SODA ASH PLANT (FROM SOLUTION BRINE)

Sodium carbonate is a common inorganic industrial chemical, also known as soda ash (Na_2CO_3). It is widely used in the manufacture of glass, chemicals, such as sodium silicates and sodium phosphates, the pulp and paper industries, the manufacture of detergents and for the treatment of water. Soda ash manufacture by Solvay technology is a very complex process. The natural sodium chloride solution (brine) is extracted and purified (removal of solid impurities by filtration and removal of calcium and magnesium ions by precipitation). The discovery of the chemistry of the ammonia-soda process can be traced back to the early 1800s. A few British and French plants operated in 1840-1860, but without success. The ammonia-soda process is usually called the Solvay process because in 1865 Ernest Solvay started the first really successful plant at couillet in Belgium. In 1874, the first successful ammonia-soda plant was erected in England. The ammonia-soda process is the dominant technology used throughout the world, hence this process is selected for production of soda ash.

M.S. BILLET CASTING FROM SCRAP AND SPONGE IRON USING INDUCTION FURNACE

The Induction furnace based on mini steel plant is a versatile installations where provisions are available for producing a range of steel products by Alloying and casting into various shape. The products of steel plants are

in the form of Ingots, Billets, Sheets etc. These Induction furnace based steel casting units are suitable for small scale industries and medium scale industries and yet have the capability to complete in the internal as well as international market at all counts. In mini Billets are the basic products of steel from which different types of steel products are made such as sheets, Angles, Channels, Rods, etc. Mild steel Billets are the basic raw material for manufacturing various types of re-rolled products. Mild steel billets are used for mechanical engineering works such as manufacturing machines and their parts. Steel billets are used for production of plate, sheets, strips, rod etc. by hot Rolling and cold Rolling process. It is the commercial forms of steels mill products which are directly used in the Engineering Industries. However, is the steel billets is the first form of steel for producing other shapes by rolling, forging or extrusion process.

RUBBER PLANTATION

Rubber is traditionally grown in India in the hinterlands of the South West Coast comprising of the state of Kerala and adjoining Kanyakumari District of Tamilnadu. This tract is, however, now reaching a level of saturation for rubber cultivation and the scope of further expansion of the crop is very much limited. Considering this fact, the expansion of rubber cultivation, which is of prime importance for setting up rubber production, has to take place mainly in non-traditional areas. Non-traditional areas so far identified as almost fully or marginally suitable for rubber cultivation are Arunachal Pradesh, Assam, Manipur, lower reaches of hills of Meghalaya, Mizoram, Nagaland and Tripura excluding the other state of India. Although the North Eastern Region lies far outside the traditional rubber growing zone, the agro-climatic conditions obtained here are unique in as much as near tropical features are experienced in most parts owing to low elevations, exposure to monsoons and other moderating influences. Public Sector Corporations set up later joined rubber planting endeavours on extensive scales. Thus while in Assam and Tripura, Public Sector Corporations are leading in the rubber plantation sector, in Meghalaya, Manipur, Mizoram and Arunachal Pradesh the role has played by the State Forest and Soil Conservation Departments.

Market Survey Cum Detailed Techno Economic Feasibility Reports

- * EIRI Project Reports are prepared by highly qualified & experienced consultants & Market Research and Analysis supported by a panel of Experts and Computerised.
- * Data provided are reliable and up-to-date collected from manufacturers/suppliers, plant already commissioned in India.

A complete List of Industrial Project Reports are given on www.eiribooksandprojectreports.com

EACH DETAILED PROJECT REPORT CONTAINS:

- **INTRODUCTION** : Project Mix, Uses & Applications, Quality Control Measure & Their Introduction for Attaining Required Properties Economy & Productivity Competence.
- **MARKET SURVEY** : Market Position, Installed Capacity Production, Anticipated Demand, Present Manufacturers, Statistics of Imports & Exports, Estimated Demand, Demand & Supply Gap (If available), L1/IL Issued Recently
- **PROCESS OF MANUFACTURE** : Inventory Controls & Tests, Comparative Study of Process for Manufacturing the Product, Formulations, Process Flow Sheet Diagram, Process Detail in Stages from Raw Materials to Finished Products
- **RAW MATERIALS** : Raw Material Specifications, Market Codes & Raw Material Prices, Sources of Procurement of Raw Materials [Imported/Indigenous]
- **PLANT & MACHINERY** : Range of Machineries Required, Detailed Specifications of Machines & Equipments, Prices of Machineries, Suppliers of Plant and Machineries.
- **LAND & BUILDING** : Total Land Area Requirement with Rates, Covered Area Break-up with Estimated Costs of Construction
- **PROJECT ECONOMICS** : Land & buildings, Plant, Machinery & Other Fixed Assets, Total Capital Investment, Working Capital Assessment, Raw Material & Consumable Stores, Staff Salaries & Wages, Utilities & Overheads, Total Cost of Project, Sources of Finance/Refinance, Break Even Point Determination.

For assessing Market Potential, Corporate Diversifications, Planning, Investment Decision Making and to start your own setup, Entrepreneurs and Industrialists are most welcome to contact EIRI.

EIRI Technocrats and Engineers have just prepared
"MARKET SURVEY CUM DETAILED TECHNO ECONOMIC FEASIBILITY REPORTS"
 on following lucrative products which are most viable and profitable and having bright future scope

- * COPPER SULPHATE FROM COPPER ASH/SCRAP
- * CHELATED ZINC (ZN-EDTA) 12%
- * ORTHOPAEDIC IMPLANTS AND INSTRUMENTS
- * BARLEY MALT
- * MINERAL TURPENTINE OIL (M.T.O.) FROM PETROLEUM (SUPERIOR KEROSENE OIL OR OTHER MATERIAL)
- * M.S.FASTENERS AND S.S. FASTENERS
- * P.V.C. COMPOUNDING (FRESH) FOR CABLES AND PVC PIPES
- * BANANA FIBRE EXTRACTION AND HAND MADE PAPER
- * BANANA & ITS BY PRODUCTS
- * COLOUR AND ADDITIVES MASTERBATCHES
- * METALLIC STEARATE
- * SURGICAL METHYLATED SPIRIT
- * KHADSARI SUGAR (500 TCD)
- * COTTON (RUI) FROM WASTE

- * COTTON CLOTH
- * LAUNDRY & DRY CLEANERS
- * COATED YARN
- * TOUGHENED GLASS
- * CAUSTIC SODA (SODIUM HYDROXIDE) (NaOH)
- * ELECTROLYTIC PROCESS
- * PLASTIC WASTE RECYCLING UNIT & PYROLYSIS PLANT FROM PLASTIC AND RUBBER WASTE (INTEGRATED UNIT)
- * CHITIN & CHITOSAN FROM PRAWN SHELL WASTE
- * PASTA PRODUCTION PLANT (SHORT PASTA)
- * SODIUM HYDRO SULFITE THROUGH FORMALDEHYDE ROUTE CAP-20 TPD
- * SODA ASH PLANT FROM SOLVAY PROCESS
- * ONION, AND GARLIC POWDER WITH GRAPE DEHYDRATION (RAISINS)
- * FLUSH DOORS
- * DI-METHYL PHTHALATES (DMP)
- * GLUTEN FREE BEER

Avail One Free Copy of
HI-TECH PROJECTS
 Industrial Monthly Magazine
 by Email, Contact at:
eiriprojects@gmail.com
eiribooks@yahoo.com

- * PVC AND PP FILES AND FOLDERS
- * SULFAMIC ACID PURE CRYSTAL AND OTHER GRADE (GP,SR & TM GRADE)
- * DECORATIVE LAMINATED SHEET (SUNMICA)
- * ALPHA CELLULOSE POWDER FROM COTTON WASTE
- * CAST POLY PROPYLENE FILMS (CPP FILM)
- * CASHEW NUT PROCESSING
- * BIOGAS PRODUCTION (1500 CUBIC METER PER DAY)
- * SOYA MILK AND PANEER
- * MINERAL TURPENTINE OIL (MTO)

EIRI is an expert Industrial Consultant
 working over 35 years
 and specialized to
 prepare all types of
Detailed Project Reports
 based on clients requirements.

CHEMICALS, DYES, LUBRICATING OILS, PETRO CHEMICALS ELECTROPLATING		PACKAGED DRINKING WATER		Technology of PVC Compounding & Its Applications	
<ul style="list-style-type: none"> * Small Medium & Large Chemical Industries * Industrial Chemicals Technology Hand Book * Modern Technology of Organic & Inorganic Chemicals * Electroplating, Anodizing & Surface Finishing Technology * Hand Book of Agro Chemical Indust.(Insecticide & Pesticide) * Technology of Synthetic Dyes, Pigments Intermediates * Petrochemicals, Lubricants, Greases & Petroleum Refining * H.B.of Lubricants, Greases & Petrochemicals Technology 		PRINTING & PACKAGING		<ul style="list-style-type: none"> * Polymer & Plastic Technology * H.B. of Fibre Glass Moulding * Techn. of Reinforced Plastics * Plastic Additives Technology * Technology of PET Bottles, Preform and PET Recycling * Modern Technology of Extrusion & Extruded Products * Technology of Synthetic Resins & Emulsion Polymers * Technology of Plastic Additives with Processes and Packaging * Complete Technology Book On Identification Of Plastics And Plastic Products Materials (Additives, Applications, Biodegradation, Biomedical, Bulk Moulding Compound, Chemical Analysis, Xlpe, Drip Irrigation, Expanded Polyethylene, Polystyrene & Hdpe) * Identification Of Plastics And Other Plastic Process Industries (Polystyrene, Nylon, Thermoplastic Elastomer, Alkyd Resin, Polypropylene Plastics, Melamine Formaldehyde Resins, Abs, Plastic Blends, Polyvinylidene Chloride Plastics, Polymer, Pipes) * Complete Technology Book Of Plastic Processing And Recycling Of Plastics With Project Profiles * Modern Technology Of Injection Moulding, Blow Moulding, Plastic Extrusion, Pet And Other Plastics 	
GUMS, ADHESIVES & SEALANTS		PAINT, VARNISH, SOLVENTS, POWDER COATING & LACQUERS		BAKERY, CONFECTIONERY, BISCUITS, COOKIES, BREAKFAST, PASTA & CEREALS	
<ul style="list-style-type: none"> * Technology of Gums, Adhesives & Sealants with Formulations * Hand Book of Adhesives with their Formulae (2nd Edn.) * Adhesives Technology & Formulations Hand Book * Technology of Glue & Adhesives with Adhesives Bonding and Formulations * Complete Hand Book on Adhesives and Adhesion Tech. with Project Profiles 		<ul style="list-style-type: none"> * Paint Pigment Varnish & Lacquer Manufacturing * Paint Varnish Solvents & Coating Technology * Paint, Pigment, Solvent, Coating, Emulsion, Paint Additives & Formulations * Technology of Coatings, Resins, Pigments & Inks Industries * Mfg. Tech. & Formulations H.B. on Thinners, Putty, Wall & Indu. Finishes & Synthetic Resins * Technology of Synthetic Resins & Emulsion Polymers * Technology of Paints and Coatings with Formulations * Powder Coating Technology 		<ul style="list-style-type: none"> * Technology of Biscuits, Rusks, Crackers & Cookies with Formulations (Wafer Biscuits, Cream Sandwich Biscuits, Oat Cereal Biscuits, Low Sugar Biscuits, High Fibre Biscuits, Herbal Biscuits, Dog Biscuits and other Biscuits) * Hand Book of Confectionery with Formulations * Breakfast, Dietary Food, Pasta & Cereal Products Technology * Hand Book of Modern Bakery Products (2nd Edn.) * Modern Bakery Technology & Fermented Cereal Products with Formulae * Technology of Confectionery, Chocolates, Toffee, Candy, Chewing & Bubble Gums, Lollipop and Jelly Products with Formulations * Hand Book of Bakery Industries 	
SMALL SCALE INDUSTRIES, STATIONERY, PAPER, INKS, CANDLES & EXPORT BUSINESS		PLASTIC/POLYMER PROCESSING, COMPOUNDING, INJECTION MOULDING, ROTATIONAL MOULDING, PLASTIC FILM, FIBRE GLASS, PLASTIC WASTE RECYCLING, MOULDS, PET & RESINS, ADDITIVES INDUSTRIES		FLOUR MILL (ATTA MAIDA, SUJI)	
<ul style="list-style-type: none"> * Start Your Own Export Business (How To Export) * Start Your Own Small Business and Industry * Candle Making Processes & Formulations Hand-Book * Stationery, Paper Converting & Packaging Industries * Modern Inks Formulaes & Manufacturing Industries * Profitable Businesses to Start for Entrepreneurs * Modern Small & Cottage Scale Industries * Profitable Small Cottage Tiny & Home Industries (2nd Edn.) 		<ul style="list-style-type: none"> * Moulds Design & Processing Hand Book * Hand Book of Plastic Materials & Processing Technology * Injection Moulding of Plastics * Plastic Processing & Packaging Industries * Plastic Waste Recycling Tech. * Technology of Plastic Films * Rotational Moulding Technology HandBook * Plastic Compounding, Master Batches, PET & Other Plastics * Synthetic Resins Technology with Formulations 		<ul style="list-style-type: none"> * Start Your Own Wheat Flour Mill (Atta, Maida, Suji, Bran & Besan) 	
BIO FUEL, BIO GAS & BIOPROCESSING					
<ul style="list-style-type: none"> * Technology of Bio-Fuel (Ethanol & Biodiesel) * Mod. Tech. of Bioprocessing * ModTech.of BioGas Production 					
SWEETS, NAMKEEN & SNACK FOOD					
<ul style="list-style-type: none"> * Tech of Sweets (Mithai) with Formulae * Technology of Sweets (Mithai), Namkeen and Snacks Food with Formulae * Mfr. of Snacks Food, Namkeen, Pappad & Potato Products

RESEARCH INSTITUTE 4449, NAI SARAK, MAIN ROAD, DELHI - 6 (INDIA)**

Name of Books	Rs. US\$	Name of Books	Rs. US\$	Name of Books	Rs. US\$
AGRO CULTIVATION, ANIMAL FARMING, AGRO PLANTATION & AGRO CHEMICAL/PESTICIDES/ FLORICULTURE & BEE KEEPING		<ul style="list-style-type: none"> * Technology of Food Preservation & Processing * Food Packaging Technology * Agro Based & Processed Food Products * Potato & Potato Processing Technology * Technology of Maize & Allied Corn Products * Technology of Food Processing Industries * Complete Book on Banana Cultivation, Dehydration Ripening, Processing, Products & Packaging Tech * Agro Food Processing and Packaging Technology * Modern Tech. of Tomato Processing & Dehydration (Ketchup, Juice, Paste, Soup & Drying) * Technology of Food Chemicals, Pigments & Food Aroma Compd. * Modern Technology of Agro Processing & Food Packaging Products with Project Profiles 		COSMETICS TECHNOLOGY (SYNTHETIC & HERBAL) <ul style="list-style-type: none"> * Cosmetics Processes & Formulations Hand Book * Herbal Cosmetics & Beauty Products with Formulations * Profitable Small Scale Manufacture of Cosmetics (Synthetic & Herbal) * Hand Book of Synthetic & Herbal Cosmetics * Technology of Herbal Cosmetics & Toiletries Products with Formulae 	
<ul style="list-style-type: none"> * Poultry Farm & Feed Formulae * Hand Book of Pig Farming * Agro Based H.B. of Plantation, Cultivation & Farming * Agro-Based Plantation Cultivation & Farming * Agro Chemical Industries (Insecticide & Pesticides) * Modern Bee Keeping & Honey Processing * Technology of Modern Rice Milling and Basmati Rice * Hand Book of Goat Farming * Floriculture Hand Book (Flowers Growing Technology) * Aloe Vera Cultivation, Processings, Formulations and Manufacturing Technology 		DAIRY FARM, MILK PROCESSING AND ICE CREAM <ul style="list-style-type: none"> * Dairy Formulations, Processes & Milk Processing Industries * Milk Processing and Dairy Products Industries * Dairy Farming to Produce Milk with Packaging * Hand Book of Ice Cream Technology and Formulae * Hand Book of Milk Processing, Dairy Products and Packaging Technology * Dairy Farming for Milk Production Technology * Commercial Dairy Farming with Project Profiles 		OILSEEDS AND FATS <ul style="list-style-type: none"> * Hand Book of Oils, Fats and Derivatives with Refining & Packaging Technology * Technology of Oilseeds Processing, Oils & Fats and Refining 	
HERBS CULTIVATION/MEDICINES		POULTRY FARM, HATCHERY & CHICKEN MEAT TECHNOLOGY <ul style="list-style-type: none"> * Technology of Chicken Meat and Poultry Products * Poultry Farming, Hatchery & Broiler Production * Poultry Farm & Feed Formulae 		ESSENTIAL OILS & AROMATIC <ul style="list-style-type: none"> * Essential Oils Manufacturing & Aromatic Plants * Modern Technology of Essential Oils * Technology of Perfumes, Flavours & Essential Oils * Essential Oils Processes & Formulations 	
<ul style="list-style-type: none"> * Herbs, Medicinal & Aromatic Plants Cultivation * Aushidhi and Sungndhit Paudho Ka Vaysayik (Hindi) * Aromatic & Medicinal Plants and Biodiesel (Jatropha) * Hand Book of Medicinal & Aromatic Plants 		WOOD, PLYWOOD, PARTICLE, BOARD, BAMBOO & FOREST <ul style="list-style-type: none"> * Modern Technology of Wood, Veneer, Plywood, Particle Board, Fibreboard, Bamboo & Forest Products 		PERFUMES AND FLAVOURS <ul style="list-style-type: none"> * Hand Book of Flavours & Food Colourants Technology * H. B. of Perfumes & Flavours * Hand Book of Perfumes with Formulations (2nd Edn.) * Technology of Perfumes, Flavours & Essential Oils * H.B. of Flavours Technology 	
FOOD & AGRO PROCESS, TOMATO PROCESSING, PRESERVATION, DEHYDRATION, FRUIT BEVERAGE, POTATO, MAIZE, MEAT, BANANA		SOAP, DETERGENT & ACID SLURRY <ul style="list-style-type: none"> * Household Soap, Toilet Soap & Other Soap * Profitable Small Scale Mfr. of Soaps & Detergents * Synthetic Detergents with Formulations (2nd Edn.) * Modern Technology of Acid Slurry, Surfactants, Soap and Detergents with Formulae * Complete Technology Book on Detergents with Formulations (Detergent Cake, Dishwashing Detergents, Liquid & Paste Detergents, Enzyme Detergents, Cleaning Powder & Spray Dried Washing Powder) * Manufacture of Washing Soap, Toilet Soap, Detergent Powders, Liquid Soap & Herbal Detergents and Perfumes with Formulations 		SOLAR PV PANELS, ENERGY <ul style="list-style-type: none"> * Technology Of Solar Pv Panels, Energy, Cells, Lantern, Cooler, Light System, Cfl Inverter, Photovoltaic System, Power Plant, Water Heater, Collector, Solar Cooling, Refrigeration, Solar Drying, Tractor, Home System, Dish Engine, Nanotechnology & Other Solar Products Manufacturing 	
<ul style="list-style-type: none"> * Fruits & Vegetable Processing Hand Book (2nd Edn.) * Fruit Beverage & Processing with Mango * Food Processing & Agro Based Industries (2nd Edn.) * Preservation & Canning of Fruits and Vegetables * Hand Book of Food Dehydration & Drying * Meat Processing & Meat Products Hand Book 		BUILDING MATERIAL & CHEMICALS <ul style="list-style-type: none"> * Technology of Building Materials & Chemicals with Processes 		TEXTILE, GARMENTS, DYEING... <ul style="list-style-type: none"> * Mod. Tech. of Bleaching, Dyeing, Printing & Finishing of Textiles * Technology of Textiles (Spinning & Weaving, Dyeing, Scouring, Drying, Printing and Bleaching) * Garments Manufacturing Tech. 	
				PULP & PAPER TECHNOLOGY <ul style="list-style-type: none"> * H.B. of Pulp & Paper, Paper Board & Paper Based Tech. 	

**LIST OF PUBLICATIONS/BOOKS PUBLISHED BY: ENGINEERS INDIA
RESEARCH INSTITUTE 4449, NAI SARAK, MAIN ROAD, DELHI - 6 (INDIA)**

Name of Books	Rs. US\$	Name of Books	Rs. US\$	Name of Books	Rs. US\$
SPICES, SEASONING & COLD STORAGE		RUBBER CHEMICALS, COMPOUNDS & RUBBER INDUSTRIES		ORGANIC FARMING & FOOD/NEEM	
* Technology of Spices and Seasoning of Spices with Formulae		* Rubber Chemicals & Processing Industries		* Hand Book of Organic Farming and Organic Foods with Vermi-Composting & Neem Product	
* Spices & Packaging with Formula		* Modern Rubber Chemicals, Compounds & Rubber Goods Technology		FISH FARMING & FISHERY PRODUCTS	
* Start Your Own Cold Storage Unit		* Technology of Rubber & Rubber Goods Industries		* Hand Book of Fish Farming and Fishery Products	
NON WOVEN TECHNOLOGY		AYURVEDIC MEDICINES		TEXTILE AUXILIARY & CHEMICALS	
* Complete Tech. of Nonwovens Fabrics, CarryBags, Composite, Geotextiles, Medical Textiles, Fibres, Felts, Apparels, Spunlace and Absorbent Nonwoven		* Ayurvedic & Herbal Medicines with Formulae		* Textile Auxiliaries and Chemicals with Processes & Formulations	
PHARMACEUTICALS & DRUGS		* Hand Book of Ayurvedic Medicines with Formulations		* Technology of Textile Chemicals with Formulations	
* Pharmaceuticals and Drugs Technology with Formulations		STAINLESS STEEL, NON FERROUS METALS, BILLETS & ROLLING MILL		* Modern Technology of Textile Auxiliary and chemicals with formulations	
LEATHER & LEATHER PRODUCTS		* Modern Technology of Non Ferrous Metals and Metal Extraction		* Textile Processing Chemicals, Enzymes, Dye Fixing Agents and Other Finishes with Project Profiles	
* Hand Book of Leather & Leather Products Technology		* Processing Technology of Steels and Stainless Steels		DISINFECTANTS, CLEANERS, PHENYL, DEODORANTS, DISHWASHING DETERGENTS ETC.	
BIOTECHNOLOGY		* Modern Technology of Rolling Mill, Billets, Steel Wire, Galvanized Sheet, Forging & Castings		* Manufacture of Disinfectants, Cleaners, Phenyl, Repellents, Deodorants, Dishwashing Detergents & Aerosols with Formulations	
* Hand Book of Biotechnology		* Manufacturing Technology of Non-Ferrous Metal Products		COFFEE & COFFEE PROCESSING	
CERAMICS & CERAMIC PROCESS		FOOD ADDITIVES/CHEMICALS AND SWEETENERS & FOOD EMULSIFIERS		* Start Your Own Coffee & Coffee Processing	
* H.B. of Ceramics & Ceramics Processing Technology		* Modern Technology of Food Additives, Sweeteners and Food Emulsifiers		ONION CULTIVATION, DEHYDRATION, POWDER PROCESSING & PACKAGING	
TREE FARMING		* Technology of Food Chemicals, Pigments and Food Aroma Compounds		* Complete Book on Onion Cultivation, Dehydration, Flakes, Powder, Processing and Packaging Technology	
* Hand Book of Tree Farming		DISPOSABLE MEDICAL PRODUCTS		* Ph: +91 9811437895, 9811151047, 91-11-23918117, 23916431, 45120361, 23947058, 64727385	
MUSHROOM PROCESSING		* Technology of Disposable Medical Products		* E-Mail : eiriprojects@gmail.com, eiritechnology@gmail.com	
* Hand Book of Mushroom Cultivation, Processing & Packaging		SOYA MILK, TOFU & SOY PRODUCTS		* Website: www.eiriindia.org, www.industrialprojects.in	
BIOFERTILIZERS & VERMICULTURE		* Technology of Soya Milk, Tofu, Hydrolyzate, Allied Soyabean Products with project Profiles		Deposit the amount in "EIRI	
* Biofertilizers & Vermiculture		* Technology of SOYBEAN Products with Formulae		"Account with HDFC BANK -	
BIODEGRADABLE PLASTICS AND POLYMERS		PRODUCTS FROM WASTE		05532020001279 (RTGS/NEFT/	
* Modern Technology of Biodegradable Plastics and Polymers With Processes (Bio-Plastic, Starch Plastics, Cellulose Polymers & others)		* Technology of Products from Wastes (Industrial, Agriculture, Medical, Municipality, Organic & Biological) By Panda		IFSC CODE: HDFC0001981) OR	
* Production of Biodegradable Plastics and Bioplastics Technology		* Products from Waste Technology Hand Book		ICICI BANK - 038705000994	
FROZEN FOOD AND FREEZE DRYING		WINE PRODUCTION		(RTGS/NEFT/IFSC CODE: ICIC0000387)	
* Complete Hand Book on Frozen Food Processing & Freeze Drying Technology		* Technology of Wine Production and Packaging			
* Modern Technology of Frozen Food Products		CASTING TECHNOLOGY			
MINERAL AND MINERALS		* Casting Technology H.Book			
* Hand Book of Minerals and Minerals Based Industries					

Send Draft in favour of "Engineers India Research Institute" (Postage Rs. 100/- Extra)
