PROFITABLE INDUSTRIES FOR YOU

SURGICAL METHYLATED SPIRIT [EIRI-1619]

The most widely used antiseptics and disinfectants are alcohols, chlorine containing compounds, elemental and organic iodine preparations, inorganic and organic mercurials, inorganic and organic preparations of silver, quaternary ammonium compounds, phenolic compounds, boric acid and other borates, oxidising agents and aldehyde derivatives. The aliphatic alcohols have varying degrees of antiseptic and disinfecting activity. Those most widely used are ethyl and isopropyl alcohol.

Cost Estimation

Plant Capacity	10,000 Ltrs/Day
Land & Building (2500 sq.mt.)	Rs. 3.48 Cr.
Plant & Machinery	Rs. 1.50 Cr.
Total Capital Investment	Rs. 6.16 Cr.
Rate of Return	23%
Break Even Point	55%

METALLIC STEARATE [EIRI-1618]

Stearates of aluminium, calcium, magnesium, and zinc are known as driers and metallic soaps. It has long been established that the metal or cation of the metallic soap is the active principle which accelerates the oxidation and polymerization reactions associated with the drying of oils. As many as twenty four metals are known to have activity, but the soaps of cobalt, manganese, lead, iron, calcium, zinc and zirconium account for the major share of present-day-use.

Cost Estimation

Plant Capacity	2 Ton/Day
Land & Building (Area 600 sq.mt.)	Rs. 92 Lacs
Plant & Machinery	Rs. 18 Lacs
Total Capital Investment	Rs. 1.95 Cr.
Rate of Return	29%
Break Even Point	52%

NEWSPAPER PRINTING [EIRI-1617]

A newspaper press is defined as one where at least one periodical is printed. In addition, this press is owned by the newspaper itself. A commercial press printing a newspaper is defined as a commercial press and not a newspaper - press.

Cost Estimation

Plant Capacity	2,40,000 Copies/Day
Land & Building (1000 sq.mt.)	Rs. 1.75 Cr.
Plant & Machinery	Rs. 83 Lacs
W.C. for 3 Months	Rs. 2.09 Cr.
Total Capital Investment	Rs. 4.77 Cr.
Rate of Return	29%
Break Even Point	46%

COLOUR AND ADDITIVES MASTER BATCHES [EIRI-1616]

As the name suggests the predispersed colors or color concentrates contain a high proportion (20-50% or even more) of pigment by weight uniformly dispersed in a suitable carrier resin. The carrier resin may be a liquid or solid. In the former case the product is a liquid dispersion while in the latter case the product is known as

solid predispersed colour. Liquid dispersions may be available as low viscosity materials for plastisols, or high viscosity pastes for thermoplastics. Solid concentrates in the form of powders they are suitable for use in powder resins.

Cost Estimation

Plant Capacity	4 Ton/Day
Land & Building (1500 sq.mt.)	Rs. 2.12 Cr.
Plant & Machinery	Rs. 55 Lacs
W.C. for 3 Months	Rs. 2.76 Cr.
Total Capital Investment	Rs. 5.53 Cr.
Rate of Return	38%
Break Even Point	40%

PAN MASALA AND GUTKHA [EIRI-1615]

Pan masala tobacco is the refined tobacco with catechu, chuna, flavouring agents and perfumery compounds etc. It refreshes the mouth and gives the feeling of cold in throat when taken in small amount. Panmasala tobacco is chewed either with pan or directly without any other thing. Zarda of various grades, specified by different numbers, constitutes different proportions of zarda in tobacco. The higher the grade number of zarda panmasala, the higher it will contain zarda content. Zarda if taken in high dose is injurious to health and gives the feeling of laziness and unconsciousness.

Cost Estimation

Plant Capacity	450 Kgs/Day
Land & Building (Area 800 sq.mt.)	Rs. 81 Lacs
Plant & Machinery	Rs. 42 Lacs
W.C. for 3 Months	Rs. 2.21 Cr.
Total Capital Investment	Rs. 3.64 Cr.
Rate of Return	40%
Break Even Point	54%

BANANA AND ITS BY PRODUCTS [EIRI-1614]

Banana is basically a tropical crop, grows well in temperature range of 13°C-38°C with RH regime of 75-85%. In India this crop is being cultivated in climate ranging from humid tropical to dry mild subtropics through selection of appropriate varieties like Grandnaine. Chilling injury occurs at temperatures below 12°C. The normal growth of the banana begins at 18°C, reaches optimum at 27°C, then declines and comes to a halt at 38°C. Higher temperature causes sun scorching.

Cost Estimation

Plant Capacity	42.50 MT/Day
Land & Building (10,000 sq.mt.)	Rs. 14.10 Cr.
Plant & Machinery	Rs. 6.78 Cr.
Total Capital Investment	Rs. 23.83 Cr.
Rate of Return	69%
Break Even Point	28%

BANANA FIBRE EXTRACTION AND HAND MADE PAPER [EIRI-1613]

The use of Banana fiber for textile and other purpose as natural material is a new concept for India. However, considerable research work has been done by textile research organizations

including BITRA, CITRA, KVIC (Khadi Village Industry Corporation) and NRCB (National Research Centre for Banana-Trichy) and it has been found that banana fiber can be a very promising source of natural fiber in the coming period. It may be noted that this fiber is already used successfully in Philippines since decades & hence it is also known popularly as Manila Hemp.

Cost Estimation

Plant Capacity	3 Ton/Day
Land & Building (2000 sq.mt.)	Rs. 2.65 Cr.
Plant & Machinery	Rs. 55 Lacs
W.C. for 3 Months	Rs. 62 Lacs
Total Capital Investment	Rs. 3.91 Cr.
Rate of Return	50%
Break Even Point	38%

HOT DIP GALVANIZING PLANT FOR STRUCTURAL STEEL AND PIPES [EIRI-1612]

Batch hot-dip galvanizing, also known as general galvanizing, produces a zinc coating by completely immersing the steel product in a bath (kettle) of molten zinc. Prior to immersion in the zinc bath, the steel is chemically cleaned to remove all oils, greases, soil, mill scale and oxides. Surface preparation is critical as zinc will not react with unclean steel. After surface preparation, the steel is immersed in the molten (830F) zinc bath.

Cost Estimation

Plant Capacity	10 MT./Day
Land & Building (Area 600 sq.mt.)	Rs. 61 Lacs
Plant & Machinery	Rs. 24 Lacs
Total Capital Investment	Rs. 1.15 Cr.
Rate of Return	47%
Break Even Point	55%

P.V.C. COMPOUNDING (FRESH) FOR CABLES AND PVC PIPES [EIRI-1611]

Indian plastics industry is one of the largest in the Asian Region. It had a modest beginning in the late twenties when articles like combs, soap boxes, ash trays etc. began to be manufactured in the country from imported raw materials. Three are about fifty materials identified as plastics & the list is being extended continuously. Plastics are classified as thermoplastics and thermo sets on the basis of the polymerization method adopted to produce the basic plastic material as on the basis of the primary raw materials source.

Cost Estimation

Plant Capacity	120 MT./Day
Land & Building (3.8 Acres)	Rs. 3.75 Cr.
Plant & Machinery	Rs. 25.50 Cr.
Total Capital Investment	Rs. 48.61 Cr.
Rate of Return	42%
Break Even Point	43%

41 PLASTIC EXTRUSION AND EXTRUDER BASED INDUSTRIES

(41 Project Reports in CD Rs. 29,214)

Top Industries to Start

1. B.O.P.P. FILM
2. COLOUR MASTER BATCHES FOR VARIOUS PLASTICS
3. DOUGH MOULDING COMPOUND (DMC), BULK MOULDING COMPOUND (BMC), SHEET MOULDING COMPOUND (SMC)
4. EXPANDED CELLULAR POLYETHYLENE SHEET
5. H.D.PE/PP BOX STRAPINGS
6. HDPE/PP WOVEN SACKS (BAGS)
7. HDPE FISHING NET
8. H.D.P.E. AND FITTING PIPES
9. HDPE PIPES AND PIPE FITTINGS
10. INJECTION & BLOW MOULDED PLASTIC PRODUCTS
11. LAMINATION OF CO-EXTRUSION MULTI LAYER FILM IN ROLL FORM
12. MULTI LAYER CO-EXTRUSION, 3 LAYER - FILM WITH LAMINATION & PRINTING
13. NYLON GRANULES FROM NYLON WASTE
14. NYLON NET FOR GIVING SHADE TO TEA PLANT IN NURSERY
15. PET GRANULES (DANA)
16. PLASTIC INJECTION MOULDING PRODUCTS
17. PLASTIC MAT
18. PLASTIC MOULDED FURNITURE
19. P.V.C. PIPES AND FITTINGS
20. PLASTIC FILMS AND SHEETS WITH PRINTING (FLEXO AND ROTO) LDPE/HDPE/PP/HM/PVC
21. PLASTIC GRANULES FROM FRESH RESIN
22. PLASTIC ROPE
23. PLASTIC CORRUGATED SHEET & BOXES
24. PLASTIC TOOTH PICK
25. POLY-VINYL FLOORING
26. PLASTIC TARPULIN
27. POLYTHENE BAGS
28. PLASTIC SUTLI OR POLYPROPYLENE SUTLI
29. PVC EXTRUSION PROFILES (WIRING CHANNELS)
30. POLY CARBONATE SHEET
31. PVC/PLASTICS (SOFT/RIGID) FILMS/ SHEET
32. POLYESTER FILM
33. P.V.C. FLEXIBLE PIPES
34. PVC NON-WOVEN MAT
35. P.V.C. CONDUIT PIPES
36. POLYESTER ZIP FASTENERS
37. POLYPROPYLENE & MULTIFILAMENT SPINNING YARN
38. PLASTIC DOORS AND WINDOWS
39. TEFLON - COATED - ELECTRIC CABLES
40. uPVC DOORS & WINDOWS PROFILES
41. X-RAY FILM

Each Project Report covers in this CD contains Introduction, Uses, Market, Process with Product Formulae, Suppliers of Plant & Equipments and Raw Materials, Cost Economics with Profitability Analysis, BEP, Resources of Finance etc.

Price of this CD containing all above 41 Project Reports is Rs. 29,214/- Payable fully in advance through Bank Draft/M.O. in favour of ENGINEERS INDIA RESEARCH INSTITUTE, DELHI. Delivery within 3 days. (To Order please dial : 098114-37895).

BABY CEREAL FOOD & MILK POWDERS (BABY FOOD PRODUCTS) [EIRI-1610]

The Baby-cereal-foods is that enriched food which has a requisite level of nutrition. This requisite level is prescribed by various dieticians & physicians for children. Various experts fixed a definite calorific value for infant food & based on this the various mixtures or formulae of foods are developed. This formula of infant food contains essential amino-acids, fats, proteins, vitamins & other essential minerals etc. which are necessary for the normal growth of child. Food products are derived from single grains or blends of mixed grains combined with other ingredients for flavour and nutritional fortification.

Cost Estimation

Plant Capacity	7 MT./Day
Land & Building (15,000 sq.mt.)	Rs. 16.88 Cr.
Plant & Machinery	Rs. 2.57 Cr.
W.C. for 3 Months	Rs. 11 Cr.
Total Capital Investment	Rs. 31 Cr.

M.S. FASTENERS AND S.S. FASTENERS [EIRI-1609]

Nuts and Bolts are most commonly used items in the family of industrial fasteners and their demand is fast increasing due to expansion of industries in the country. Bolt is a piece of metal rod whose one end is upset and at the other end threading is done. Nut is a device which rolls on bolt threads. In nuts, internal threading is done while bolts bear external thread. Screw, demonstrate their true merit in the movements, assembly etc, of wooden components. Screws are most popular as fasteners which assemble, or join parts together to be made into a complete unit.

Cost Estimation

BARLEY MALT [EIRI-1607]

Malt is germinated cereal grains that have been dried in a process known as "malting". The grains are made to germinate by soaking in water, and are then halted from germinating further by drying with hot air. Malting grains develops the enzymes required to modify the grain's starches into sugars, including the monosaccharide glucose, the disaccharide maltose, the trisaccharide maltotriose, and higher sugars called maltodextrines. It also develops other enzymes, such as proteases, which break down the proteins in the grain into forms that can be used by yeast.

Cost Estimation

Plant Capacity	50 MT./Day
Land & Building (2.5 Acres)	Rs. 5.77 Cr.
Plant & Machinery	Rs. 10 Cr.
W.C. for 1 Months	Rs. 2.71 Cr.

MAIZE PROCESSING PLANT (Starches / Modified starches/ Liquid glucose / Dextrose Monohydrate / Glucose Syrups / Corn Syrup solids / High Maltose Corn syrups / Malto Dextrine Powder / Corn Gluten Meal (60% Maize Oil / Sorbitol) [EIRI-1605]

Starch is an abundant carbohydrate distributed worldwide in plants. Starch has been a major ingredient in man's diet over the centuries. Maize starch is produced by the wet milling process, which involves grinding of softened maize and separation of corn oil seeds (germs), gluten (proteins), fibers (husk) and finally pure starch.

Cost Estimation

Plant Capacity	300 Tons
Land & Building (Area 20 Acres)	Rs. 21.88 Cr.
Plant & Machinery	Rs. 64.55 Cr.

Break Even Point	34%

TMT STEEL BARS [EIRI-1604]

Thermo mechanically treated (TMT) steel, can be described as a new-generation-high-strength steel having superior properties such as weldability, strength, ductility and tensility, which meet the highest international quality standards. Under thermo mechanical treatment (TMT), the steel bars are passed through a specially designed water-cooling system where they are kept till the outer surface of the bars becomes colder while the core remains hot. This creates a temperature gradient in the bars. When the bars are taken out of the cooling system, the heat flows from the core to the outer surface, further tempering of the bars, which helps them attain a higher yield strength.

Cost Estimation

Plant Capacity	100 MT./Day
Land & Building (Area 3 Acres)	Rs. 3.18 Cr.
Plant & Machinery	Rs. 7.18 Cr.
W.C. for 1 Months	Rs. 9.10 Cr.
Total Capital Investment	Rs. 20.61 Cr.
Rate of Return	51%
Break Even Point	48%

CHELATED ZINC (ZN-EDTA) (12%) [EIRI-1603]

Zinc EDTA is a derivative of Ethylene diamine Tetra acetic Acid. Ethylene diamine Tetra acetic Acid is a Sequestering/Chelating Agent. EDTA is a synthetic amino acid. It is widely known as EDTA. It is a white powder. EDTA Acid is insoluble in water. It is also named as Ethylene diamine Tetra acetate. It is widely used to dissolve Metallic Impurities. There are various Salts / Derivatives of EDTA. EDTA is widely recognized as effective Sequestering Agent. EDTA grabs metallic cation such as Lead or Calcium from the process and forms a stable compound that is then excreted from the system. The stability of this bond is vital to get the success in removing the inorganic

impurities out of the system. If the bond is weak, other chemicals can break this bond to form their own compounds.

Cost Estimation

Plant Capacity	1.50 MT./Day
Land & Building (1000 sq.mt.)	Rs. 1.52 Cr.

DIRECT FILLED BALL PEN (USE AND THROW) [EIRI-1556]

Direct Filled Ball Pens are manufactured generally from plastic in different varieties to cope with demand of different classes of people. Majority of people in India like medium variety Ball pen. Plastics are accepted by engineers as important new materials. These are derived from petroleum oil, salt, air and water during the last 5 to 10 year considerable progress has been made in plastic moulding and extrusion. The plastic which becomes soft when heated and harden when cooled are thermoplastics. Since they under go basic chemical change during forming.

DISPOSABLE SYRINGES & NEEDLE PLANT (SINGLE USE SYRINGES, SINGLE USE NEEDLES & AS SYRINGES) [EIRI-1553]

Disposable Plastic Syringes are being used by doctors to inject medicines through Intravenous or intramuscular ways for the treatment of diseases & also by research & development personnel. Disposable syringes are made of plastic material and are used in the field of medical and veterinary science. Due to their availability in sterilized condition, ready to use, and cost effectiveness, disposable syringes are fast replacing the age old glass syringes. Moreover, the horror of AIDS worldwide has almost dispensed with the reuse of syringes and the demand of disposable syringes has increased phenomenally. Disposable syringes are mostly injection moulded from polypropylene. Syringes are available in sizes of 1 ml, 2 ml, 5ml and 10ml, 50ml in a variety of designs and consist of either two or three

components construction. The number and size of injection moulding machines required depend upon syringe construction, number of mould cavities, annual production.

P.V.C. BATTERY SEPARATOR [EIRI-1552]

Amongst the various systems and devices that are available for converting electrical energy to some form of storage energy for reconversion to electrical energy, lead storage battery is the most effective system available. The use of storage batteries is far and wide, and mainly in the field of automobile, telephone exchange, submarines, aircrafts etc. Before 1946, most separators used in storage batteries were of wood and since then, these have been replaced either by PVC or microporous rubber which are highly suitable. Sintered microporous PVC battery separators are the separators used in the storage batteries all over the world for enhancing the life and quality of the battery. The function of a separator is to isolate the positive and negative plates in a battery by providing a perfect insulation, these preventing short circuit in them. At the same time the separators function as a permeable membrane so as to effect circulation of the electrolytes for the chemical reactions and free ionic flow.

NEW INDUSTRIES TO START- PROFITABLE

ALUMINIUM ALLOY PLANT

[EIRI-1550]

Aluminium alloys are alloys in which aluminium (Al) is the predominant metal. The typical alloying elements are copper, magnesium, manganese, silicon and zinc. There are two principal classifications, namely casting alloys and wrought alloys, both of which are further subdivided into the categories heat-treatable and non-heat-treatable. About 85% of aluminium is used for wrought products, for example rolled plate, foils and extrusions. Cast aluminium alloys yield cost-effective products due to the low melting point, although they generally have lower tensile strengths than wrought alloys.

KRAFT PAPER USING WASTE PAPER AND OLD CORRUGATED

CARTONS [EIRI-1549]

Paper form a commodity of prime importance to day from the parts of view of mass communication, education and industrial and economic growth. The art of paper making was first discovered in China in and around 2nd century. B.C. pan where it travelled slowly west ward and reached the prantiens of Europe. By the end of 14th century, a member of paper mill existed in Europe, particularly in Spain, Italy, France and Germany. The invention of printing in 1956 brought a vastly in creased demand for paper, and paper-manufacturing was introduced to England. America followed in 1690. Paper production requires a disintegration of the bulky fibrous material to individual or small agglomerate fibres.

WALNUT PROCESSING PLANT

[EIRI-1548]

A walnut is an edible seed of any tree of the genus Juglans, especially the Persian alnut, Juglans regia. Broken nutmeats of the eastern black walnut, from the tree Juglans nigra, are also commercially available in small quantities, as are foods prepared with butternut nutmeats. Walnut seeds are high density source of nutrients, particularly proteins and essential fatty acids. Walnut seeds, like other tree nuts, must be processed and stored properly. Poor storage makes walnut seeds susceptible to

insect and fungal mold infestations; the latter produces aflatoxin - a potent carcinogen. Mold infested walnut seed batch should not be screened then consumed; the entire batch should be discarded. In certain parts of the world, walnuts are locally known as walnisse, noix, nuz, nuc, akhar, kurumi.

SOY AND GLUTEN BASED

MOCK MEAT [EIRI-1547]

Golden palaces of mock meat. Most towns have one; if you don't know where it is, ask your local vegan or vegetarian. Staples in many vegetarian and vegan diets, meat analogs are food products that look, feel and taste like meat from an animal. Analogs blend plant-based proteins with flavoring, fat and coloring to replicate beef, poultry or seafood, and in some cases are used as filler in meat. These meatless morsels are often made of wheat gluten (also called seitan). Gluten is the protein produced when combining wheat's two major proteins, gliadin and gluten in, with water or milk through the process of kneading.

CASTOR OIL DERIVATIVE OLEO RESIN [EIRI-1068]

Castor oil obtained by a combination of pressing and extraction from the seeds of the castor oil plant (Ricinus communis) consists of upto 90% of triglyceride of ricinoleic acid, 12 hydroxy oleic acid. The hydroxyl number of castor oil is 161-169. The component glycerides of castor oil (%mole) comprise saturated-diricinoleins (7.3%) oleo-diricinoleins (2.5%) Linoleo diricinoleins (13.4%), Dihydroxy Stearo diricinoldins (2%) Triricinolein (74.8%). More important the non-drying ricinoleic acid in the castor oil can be dehydrated to give a drying oil i.e. dehydrated castor oil. This drying oil is formed by heating castor oil under reduced pressure of 240-260oC in the pressure of 0.1-0.2 wt.% of an acid catalyst e.g. H2SO4, phosphoric acid, or acidic salts with the elimination of water from ricinoleic acid.

UPVC DOORS & WINDOWS FABRICATING PLANT (FIXING AND INSTALLATION OF DOORS AND WINDOWS OF UPVC PROFILES) [EIRI-1245]

PVC was produced for the first time in 1935 and has been industrially manufactured in large quantities for over 50 years. It has been developed into a material that can offer a wider range of properties and therefore has many different applications. The production process starts with sodium chloride, (common salt) from which chlorine gas is obtained by electrolysis. Petroleum or natural gas is used to produce ethylene, one of many products of the process

Patrons, deposit amount in EIRI Account

PLASTICIZERS [EIRI-1230]

Plasticizers (UK = plasticisers) or dispersants are additives that increase the plasticity or fluidity of a material. The dominant applications are for plastics, especially polyvinyl chloride (PVC). The properties of other materials are also improved when blended with plasticizers including concrete, clays, and related products. The worldwide market for plasticizers in 2000 was estimated to be several million tons per year. Throughout the period from 1970 to 1995, the worldwide plasticizer markets grew at rates above the various GNPs; however this trend has started to decrease in North America and in Europe. In recent years, the average growth rate in those regions has ranged between 2 and 3%, with projected growth rates of only 1-2%.

LIQUID GLUCOSE, CATHETERS, FLOUR MILL ETC.

LIQUID GLUCOSE AND MALTO DEXTRIN FROM BROKEN RICE

[EIRI-1516]

Starch is a group of polysaccharides, composed of glucopyranose units joined together by glucosidic linkages. It conforms to the molecular formula, (C₆H₁₀O₅)_n, where n varies from a few hundred to over one million. Starch is found as the reserve carbohydrate in various parts of plants and is enzymatically broken down to glucose to other carbohydrates according to the metabolic needs of the plants. Industrially, starch is broadly divided into two types viz, natural and modified. Natural starches, also designated as unmodified starches or simply starches, are obtained from grains such as and sorghum, from roots like potato, tapioca and arrow root, and from the pith of the stems of certain palms such as sago.

Cost Estimation

MINI FLOUR MILL

(ATTA, MAIDA, SUJI) [EIRI-1511]

The plant will have facility to produce, Maida, Sooji, Atta and bran. These products will be sold as per the guidance issued for Food and Civil Supplies Department of the concerned state. The same plant can be used to process other cereals such as rice gram, dal etc. However, attempt is made have to examine feasibility and profitability of processing wheat to produce Maida, Sooji, Atta and bran. Flour mill serve the purpose of processing wheat to convert it into flour. Wheat grains are the seeds of the wheat plant which is able to grow in kinds of soil and under widely differing climatic conditions. The principle wheat of commerce belong to the botanical groups Triticum vulgane, Triticum durum and triticum compactum. A grain of wheat is avoid in shape and it bears at one end a number of short fine grains.

CATHETERS MANUFACTURING

[EIRI-1490]

A catheter is a flexible tube made of latex, silicone, or Teflon that can be inserted into the body creating a channel for the passage of fluid or the entry of a medical device. For many years the epidermal catheters used were plain tubes made of available industrial compounds, and design was largely based on current need. Catheters are designed to perform tissue ablation (tissue removal) and even serve as conduits for thermal, optics, and various medical devices. The three major types of catheters are coronary, renal, and infusion. Coronary catheters are used for angiography (x-ray of blood vessels after injection of radiopaque substance), angioplasty (altering the structure of a vessel) and ultrasound procedures in the heart or in peripheral veins and arteries.

HDPE, PVC, LLDPE PIPES/ TUBES & FITTING [EIRI-1497]

PVC is a thermosetting plastic. In other words, it can only be softened and molded into form once. If it is softened and remolded a second time it will lose some of its favorable characteristics. PVC is very corrosion resistant. It is not a conductor and will not have an electrochemical reaction with acids and bases that it comes in contact with. For this reason, PVC is sometimes used to coat other materials for protection. PVC also has a high chemical resistance. While it will react with some chemicals, there are a large number of chemicals it will not react with, making it an excellent product for industrial applications. PVC is not without its faults.

BANANA CHIPS, BANANA PULP & BANANA POWDER (BANANA PRODUCTS)

[EIRI-1483]

The technology development in agriculture is very fast, it results in developing Tissue Culture Technique. Banana is basically a tropical crop, grows well in temperature range of 13:C - 38:C with RH regime of 75-85%. In India this crop is being cultivated in climate ranging from humid tropical to dry mild subtropics through selection of appropriate varieties like Grandnaine. Chilling injury occurs at temperatures below 12:C. The normal growth of the banana begins at 18:C, reaches optimum at 27:C, then declines and comes to a halt at 38:C. Higher temperature causes sun scorching.

BOTTLING PLANT (COUNTRY LIQUOR) [EIRI-1233]

There are nevertheless several very early references which can be taken to indicate that a potable spirit (like country liquor) was known many thousands of years ago. The earliest regarding excessive consumption of potable distilled spirit, i.e. country liquor and other products, appear to have come from China, some 1000 years B.C. Aristotle later mentions purifying sea water by evaporation, and also "wine which produces a spirit". For centuries the art of distilling remained firmly in the hands of alchemists. Herbs had long been thought to cure various maladies, agriurduly for Jaundice, fox glore, for blisters and it would seem that the alchemists argued that, if the juice of one of these herbs could be, say, quadrupled in strength, then the efficiency of cure would be multiplied four fold. The alchemists were responsible for many improvements in the art of distilling.

LUCRATIVE INDUSTRIES TO START..

MAIZE & BY-PRODUCTS PROCESSING [EIRI-1421]

Starch is an abundant carbohydrate distributed worldwide in plants. Starch has been a major ingredient in man's diet over the centuries. In addition it has become a major industrial raw material. Plant seeds, roots and tubers are all sources of industrial starch production. The commercial realities of the starch recovery process limit the industrial sources mainly to wheat, maize and tapioca. Indian starch industry mainly consumes maize as input raw material. Maize is doing wonderful things in our everyday life. Maize (Corn) contains about 70% starch, other components being protein, fibers and fat. The basis of the maize milling process is the separation of the maize kernel into its different parts.

DETERGENT CAKE AND POWDER [EIRI-1485]

Synthetic detergents have developed in the beginning of 20th Century and started making in-roads into the area earlier served by washing compounds i.e. soaps made traditionally from oils/fats and caustic soda. Since soaps have comparatively lesser washing characteristics in hard water than synthetic detergents, synthetic washing compounds have been able to occupy a significant market which was enjoyed by washing soaps earlier. The term detergent originated from the latin word detergere (i.e. wipe off), is now-a-days applied to all synthetic washing compounds. Synthetic detergent is not only used as household cleaning material but also have industrial applications in textiles, pesticide industry as carriers, etc.

COW DAIRY FARMING (AYRSHIRE/HOLSTEIN) AND MILK PROCESSING [EIRI-1486]

Dairy industry is of crucial importance to India. The country is the world's largest milk producer, accounting for more than 13% of world total milk production. It is the world largest consumer of dairy products, consuming almost 100% of its own milk production. Dairy products are a major source of cheap and nutritious food to millions of people in India and the only acceptable source of animal protein

for large vegetarian segment of Indian population, particularly among the landless, small and marginal farmers and women. India's high-value, high-volume market for traditional dairy products and delicacies is all set to boom further under the technology of mass production. This market is the largest in value after liquid milk and is estimated at US\$3 billion in India and US\$1 billion overseas. More and more dairy plants in the public, cooperative and private sectors in India are going in for the manufacture of traditional milk products.

SURGICAL COTTON, ROLLER BANDAGE, CREPE BANDAGE & PLASTER CAST (READYMADE) E.G. GYPSONA, 3M CAST [EIRI-1494]

Absorbent Cotton also known as Surgical Cotton or Cotton Wool is mainly used for medical purposes in hospitals, nursing homes, dispensaries etc., Because of high fluid absorbency power, it is better known as absorbent cotton. The absorbent cotton should be chemically inert and soft to give maximum protection and should not cause irritation. These properties can be achieved by manufacturing the product as per standard method of manufacture. The raw cotton is processed by series of steps which render the cotton hydro-phallic in character and free from external impurities needed to be fit for use in surgical dressings and personal hygiene.

DICALCIUM PHOSPHATE FROM ROCK PHOSPHATE [EIRI-0745]

Dicalcium phosphate exists in anhydrous as well as dehydrate form, the latter being the form marketed as a fertilizer. When pure, dehydrate form contains 41.26% P₂O₅ (18.33%P) and is largely citrate-soluble. Dehydrate was more soluble than anhydrous. It was more soluble in ammonium sulphate solution than in others. The Naubauer test with barely using ³²P showed that the uptake of fertilizer phosphorous was more from the dehydrate form. The basic raw material for this product being rock phosphate.

Cost Estimation

Plant Capacity	10 Ton/Day
Land & Building (2 Acres)	Rs. 2.35 Cr.
Plant & Machinery	Rs. 1.74 Cr.
W.C. for 1 Months	Rs. 52 Lacs
Total Capital Investment	Rs. 4.90 Cr.
Rate of Return	23%
Break Even Point	67%

LUBE OIL BLENDING WITH GREASES [EIRI-0791]

Lube oils generally include all classes of lubricating materials that are applied as fuels. Nearly all of the world's lube oils are made from the more viscous portion of the crude oil which remain after removal of gas oil and lighter fractions by distillation. Much of the variations in physical characteristics and performance qualities of lubricating oils prepared from different crude sources can be accounted for by the millions of variations that can exist in a single large hydrocarbon molecule. In order to minimize variations and produce products that provide consistent performance in specific applications, four steps are followed in the manufacture of finished lubricating oils from the various available crudes.

Cost Estimation

Plant Capacity	5 KLS/Day Lube Oil Blending 1 Ton/Day Grease
Land & Building (2000 sq.mt.)	Rs. 1.14 Cr.
Plant & Machinery	Rs. 71 Lacs
W.C. for 3 Months	Rs. 3.11 Cr.
Total Capital Investment	Rs. 5.10 Cr.
Rate of Return	46%
Break Even Point	33%

MAIZE STARCH, LIQUID GLUCOSE, DEXTROSE (MAIZE AND ITS PRODUCTS)

Starch is an abundant carbohydrate distributed worldwide in plants. Starch has been a major ingredient in man's diet over the centuries. In addition it has become a major industrial raw material. Plant seeds, roots and tubers are all sources of industrial starch production. The commercial realities of the starch recovery process limit the industrial sources mainly to wheat, maize and tapioca. Indian starch industry mainly consumes maize as input raw material. Maize is doing wonderful things in our everyday life.

Cost Estimation

Plant Capacity	Starch 90,000 MT/Annum Liquid Glucose 10,000 MT/Annum Dextrose Monohydrate 2,500 MT/Annum Maize Germ 300 MT/Annum Sorbitol 4,500 MT/Annum Dextrin 3,500 MT/Annum Gluten 4,500 MT/Annum Animal feed 8,800 MT/Annum
Land & Building (20 Acres)	Rs. 18.49 Cr.
Plant & Machinery	Rs. 69.35 Cr.
W.C. for 2 Months	Rs. 82.80 Cr.
Total Capital Investment	Rs. 172.76 Cr.
Rate of Return	75%
Break Even Point	25%

Market Survey Cum Detailed Techno Economic Feasibility Reports

- To get Loan/Finance from Banks/Finacial Institutes.
- To set up your own Industry/Unit
- To have Detailed & Exhaustive Data on any Project.

* EIRI Project Reports are prepared by highly qualified & experienced consultants & Market Research and Analysis supported by a panel of Experts and Computerised.
 * Data provided are reliable and uptodate collected from manufacturers/suppliers, plant already commissioned in India.

A complete List of Industrial Project Reports are given on www.eirbooksandprojectreports.com

EACH DETAILED PROJECT REPORT CONTAINS:

- ☛ **INTRODUCTION** : Project Mix, Uses & Applications, Quality Control Measure & Their Introduction for Attaining Required Properties Economy & Productivity Competence.
- ☛ **MARKET SURVEY** : Market Position, Installed Capacity Production, Anticipated Demand, Present Manufacturers, Statistics of Imports & Exports, Estimated Demand, Demand & Supply Gap (If available), LI/IL Issued Recently
- ☛ **PROCESS OF MANUFACTURE** : Inventory Controls & Tests, Comparative Study of Process for Manufacturing the Product, Formulations, Process Flow Sheet Diagram, Process Detail in Stages from Raw Materials to Finished Products
- ☛ **RAW MATERIALS** : Raw Material Specifications, Market Codes & Raw Material Prices, Sources of Procurement of Raw Materials [Imported/Indigenous]
- ☛ **PLANT & MACHINERY** : Range of Machineries Required, Detailed Specifications of Machines & Equipmants, Prices od Machineries, Suppliers of Plant and Machineries.
- ☛ **LAND & BUILDING** : Total Land Area Requirement with Rates, Covered Area Break-up with Estimated Costs of Construction
- ☛ **PROJECT ECONOMICS** : Land & buildings, Plant, Machinery & Other Fixed Assets, Total Capital Investment, Working Capital Assessment, Raw Material & Consumable Stores, Staff Salaries & Wages, Utilities & Overheads, Total Cost of Project, Sources of Finance/Refinance, Break Even Point Determination.

For assessing Market Potential, Corporate Diversifications, Planning, Investment Decision Making and to start your own setup, Entrepreneurs and Industrialists are most welcome to contact EIRI.

EIRI Technocrats and Engineers have just prepared
“MARKET SURVEY CUM DETAILED TECHNO ECONOMIC FEASIBILITY REPORTS”
 on following lucrative products which are most viable and profitable and having bright future scope

- * COPPER SULPHATE FROM COPPER ASH/SCRAP CHELATED ZINC (ZN-EDTA) 12%
- * ORTHOPAEDIC IMPLANTS AND INSTRUMENTS BARLEY MALT
- * MINERAL TURPENTINE OIL (M.T.O.) FROM PETROLEM (SUPERIOR KEROSENE OIL OR OTHER MATERIAL)
- * M.S.FASTENERS AND S.S. FASTENERS
- * P.V.C. COMPOUNDING (FRESH) FOR CABLES AND PVC PIPES
- * BANANA FIBRE EXTRACTION AND HAND MADE PAPER BANANA & ITS BY PRODUCTS
- * COLOUR AND ADDITIVES MASTERBATCHES
- * METALLIC STEARATE
- * SURGICAL METHYLATED SPIRIT
- * KHADSARI SUGAR (500 TCD)
- * COTTON (RUI) FROM WASTE

- COTTON CLOTH
- * LAUNDRY & DRY CLEANERS
- * COATED YARN
- * TOUGHENED GLASS
- * CAUSTIC SODA (SODIUM HYDROXIDE) (NaOH) ELECTROLYTIC PROCESS
- * PLASTIC WASTE RECYCLING UNIT & PYROLYSIS PLANT FROM PLASTIC AND RUBBER WASTE (INTEGRATED UNIT)
- * CHITIN & CHITOSAN FROM PRAWN SHELL WASTE
- * PASTA PRODUCTION PLANT (SHORT PASTA)
- * SODIUM HYDRO SULFITE THROUGH FORMALDEHYDE ROUTE CAP-20 TPD
- * SODA ASH PLANT FROM SOLVAY PROCESS
- * ONION, AND GARLIC POWDER WITH GRAPE DEHYDRATION (RAISINS)
- * FLUSH DOORS
- * DI-METHYL PHTHALATES (DMP)
- * GLUTEN FREE BEER

LIST OF THE READY AVAILABLE E-BOOKS BY EIRI. CONTACT AT eiribooks@yahoo.com for price

01. Adhesive Technology and formulations hand book (Hand Book of Adhesives)	Essential Oils	on Home & Small Scale Industries
02. Agro Based & Processed food Prd.	36. Technology of PVC Compounding and Its Applications	69. Technology of Reinforced Plastics
03. Agro food Processing & Packaging	37. Technology of Rubber & Rubber Goods Industries	70. Rotational Moulding Technology Hand Book
04. Aloe Vera Cultivation, Processings, Formulations & Manufacturing Tech.	38. Technology of Sweets (Mithai) with Formulae	71. Modern Technology of Tomato Processing and Dehydration-Ketchup, Juice, Paste, Puree, Soup and Drying
05. Complete Book on Banana Cultivation, Dehydration, Ripening, Processing, Products & Packaging	39. Technology of Synthetic Dyes, Pigments & Intermediates	72. Complete Technology of Nonwovens-Fabrics, Carrybags, Composites, Geotextiles, Medical Textiles, Fibres, Felts, Apparels, Spunlace & Absorbent Nonwovens
06. Citrus Fruits cultivation & Processing	40. Technology of Oilseeds Processing, Oils & Fats and Refining	73. Technology of Soybean Products with Formulae
07. Commercial Dairy farming to produce milk with project profiles	41. Textile Auxiliaries and Chemicals with Processes & Formulations	74. Modern Technology of Agro Processing and Food Packaging Products with Project Profiles
08. Complete Handbook on frozen food processing & freeze drying technology	42. Hand book of Offset Printing Technology, Pre-Press, Plate Making, Web Offset, Newspaper Production	75. Technology of Soya Milk, Tofu, Hydrolyzate, allied Soyabean Products with Project Profiles
09. Dairy farming for milk production	43. Hand Book of Organic Farming & Organic Foods with Vermi-Composting and Neem Products	76. Products from Waste Technology Handbook
10. Technology of Synthetic Resin & Emulsion Polymers	44. Hand Book of Packaging Technology	77. Food Additives, Sweeteners
11. Floriculture Hand Book (Hand book of flowers growing technology)	45. Hand Book of Plastic Materials and Processing Technology	78. Technology of Food Chemicals, Pigments and Food Aroma Compounds
12. Fruit Beverages and Processing with Mango Products	46. Hand Book of Poultry Farming & Feed Formulations	79. Technology of Glue and Adhesives with Adhesives Bonding and Formulations
13. Modern Technology of Printing Inks	47. Hand Book of Prepress	80. Coffee Processing Hand Book
14. H. B. of Biofertilizers & Vermiculture	48. Hand Book of Spices & Packaging with Formulaes	81. Casting Technology HandBook
15. H. B. of Adhesives with formulaes	49. Hand Book of Ceramics & Ceramics Processing Technology	82. Powder Coating Technology Hand Book
16. Hand Book of Aromatic & Medicinal plants and Biodiesel (Jatropha)	50. Injection Moulding of Plastics	83. Poultry Farming, Hatchery and Broiler Production
17. Hand Book of Ayurvedic Medicines with formulations	51. Manufacture of Snacks Food, Namkeen, Pappad & Potato Products	84. Technology of Wine Production and Packaging
18. Hand Book of dairy farming to produce milk with packaging	52. Manufacturing Technology of Non-Ferrous Metal Products	85. Modern Technology of Bioprocessing (Fermentation, Food, Enzyme, Pharmaceutical, Industrial, Agricultural and Energy)
19. Hand Book of Electroplating Anodizing & Surface finishing technology	53. Technology of Chicken Meat and Poultry Products	86. Profitable Small Scale Manufacture of Cosmetics (Synthetic/Herbal)
20. Hand Book of Flavours Technology	54. Meat Processing & Meat Products H.B.	87. Technology of Herbal Cosmetics and Toiletries Products with Formulae
21. H.B. of Food Dehydration & Drying	55. Technology of Water & Packaged Drinking Water	88. Tech of Maize & Allied Corn Products
22. Hand Book of Garments Manufacturing Technology	56. Modern Technology of Frozen Food Products	89. Complete Hand Book on Adhesives and Adhesion Technology with Project Profiles
23. Hand Book of Goat Farming	57. Modern Technology of Non-Ferrous Metals and Metal Extraction	90. Hand Book of Tree Farming
24. Hand Book of Ice Cream Technology and formulae	58. Modern Bakery Tech. & Fermented Cereal Products with Formulae	91. Hand Book of Pig Farming
25. Hand Book of Lubricants, Greases and Petrochemicals Technology	59. Modern Bee Keeping and Honey Processing Technology	92. Technology of Paints and Coatings with Formulations
26. Hand Book of Medicinal and Aromatic Plant Cultivation, Utilisation & Extraction Processes	60. Modern Technology of Acid Slurry, Surfactants, Soap and Detergents with formulae	93. E-Book Formulations on Nail Enamel & Nail Polish Removers
27. Hand Book of Mushroom Cultivation, Processing and Packaging	61. Modern Technology of Extrusion & Extruded Products	94. E-Book Formulations on Herbal Hair Oils & Hair Lotions, Hair Vitalizer, Hair Styling Gel & Afro Products
28. Technology of Reinforced Plastics	62. Modern Technology of Rolling Mill, Billets, Steel Wire, Galvanized Sheet, Forging and Castings	95. E-Book on Herbal Cold Cream, Moisturizing Cream with Aloe Vera & Fairness Creams
29. Rotational Moulding Technology	63. Technology of Pet Bottles, Preform and Pet Recycling	
30. Technology of Sweets, Namkeen and Snacks Food with Formulae	64. Plastic Additives Technology Hand Book	
31. Technology of Coatings, Resins, Pigments & Inks Industries	65. Plastic Waste Recycling Technology	
32. Technology of Confectionery, Chocolates, Toffee, Candy, Chewing & Bubble Gums, Lollipop and Jelly products with formulations	66. Potato & Potato Processing Technology	
33. Technology of Food Preservation and Processing Canning, Fermented Beverages, Fruit Concentrates, Pickles, Cold Storage & Fermented Alcoholic and Non-Alcoholic Beverages	67. Profitable Businesses to Start for Entrepreneurs	
34. Tech. of Food Processing Industries	68. Profitable Small, Cottage, Tiny and Home Industries A complete handbook	
35. Technology of Perfumes, Flavours and
